

フレキな電池に

亜鉛箔

For flexible batteries

Zinc Foil

用途

一次電池および二次電池の負極

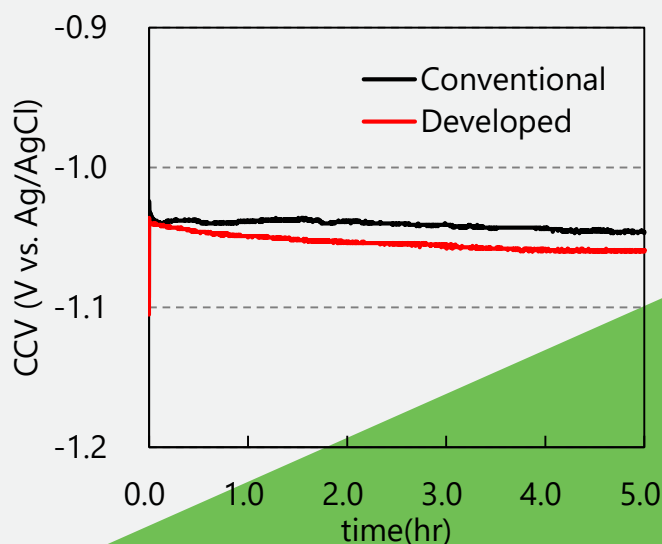

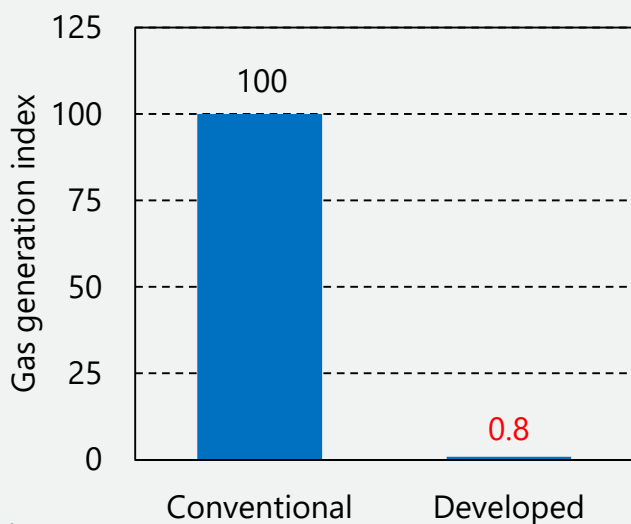

Negative electrodes for primary and secondary batteries.

概要・特徴

- シート状の亜鉛電池に最適
Ideal for sheet-shaped zinc batteries
- 活物質としてだけでなく電極としてもご使用可能
Can be used as an electrode as well as an active material
- 膜厚は任意に調整可能 (30~300 μm)
Thickness can be designed

Conventional : Pure zinc foil by rolling method

Developed : Zinc alloy foil by electrolytic method
